PROFESSIONAL PROFILE

Developer specialized in **Laravel and PHP backend** for multi-tenant enterprise SaaS, currently building production modules for a Norwegian logistics TMS. Proven production experience: finance-grade modules with strict transactional integrity, real-time communication (WebSockets / Laravel Reverb), AI integrations (Google Gemini, RAG) and self-managed VPS deployment with CI/CD. On the frontend I work with Vue and React; on mobile, Flutter.

PROFESSIONAL EXPERIENCE

Full-Stack Developer | FleetX (Frakt24) — Norwegian TMS | January 2026 – Present

- Designed and built a multi-pollutant emissions engine (CO₂e, NO_x, PM, CO, HC) for a multi-tenant logistics SaaS platform, adopting the **GLEC Framework v3.2 and ISO 14083** (CSRD-ready).
- Designed and built the **per-route financial profitability module**: finance-grade precision (bcmath), atomic transactions, row-level locking and idempotent requests under multi-tenant concurrency.
- Built the **driver Daily Report module** end to end — a cross-repo feature: multi-tenant Laravel backend, a Vue review-and-approval dashboard, and an offline-first Flutter app with push notifications.
- Designed the data contract between backend and mobile (Firestore) and worked with attendance data from multiple sources (tachograph, punch-ins), with a full audit trail and test-first delivery.

Full-Stack Developer | Gesa Mediación S.L., Murcia, Spain | September 2025 – December 2025

- Built an **AI-powered nutrition app** as the sole developer, from zero to delivery in 4 months: Laravel backend (REST API, data modeling, business logic) and the complete Flutter mobile client.
- Implemented AI nutritional analysis (image and PDF document recognition) with Firebase AI Logic.
- Integrated push notifications and real-time Firestore sync, keeping strict parity across the backend and mobile repositories.

Full-Stack Developer | Apuestas de Murcia, Murcia, Spain | February 2025 – June 2025

- Developed an internal gaming-venue management platform (ManagePoint) on Laravel: role-based access control (RBAC), user management and automated PDF reporting that cut administrative overhead.
- Designed the relational database with Laravel migrations and optimized queries for reporting-heavy views.

IT Systems & Networks Technician | Ticarum, Murcia, Spain | March 2023 – June 2023

- Performed preventive and corrective hardware maintenance, administered Linux environments and provided technical support.

SELECTED PROJECTS

Truekapp | truekapp.xyz | In production

- Full-stack barter marketplace (started as my final degree project, taken to real production): Laravel 12, real-time chat (Reverb/WebSockets), AI assistant with agentic RAG and tool calling (Google Gemini), semantic search and AI image moderation.
- 120+ tests (Pest), CI/CD with GitHub Actions, deployed on a self-managed VPS (Hetzner: Nginx, PHP-FPM, Supervisor, Cloudflare).

VALO-DEX | valodex-app.vercel.app | Live demo

- React 18 + TypeScript + Vite SPA aggregating two third-party APIs behind a serverless proxy with per-region caching and sliding-window rate limiting.

Professional portfolio | camilotaba.dev | In production

- Bilingual (EN/ES) site built with Astro 5 and Tailwind CSS: technical SEO (JSON-LD, hreflang, sitemap), WAI-ARIA accessibility and performance-optimized delivery (inlined CSS, WebP images). Includes live demos of the projects above.

EDUCATION

Higher Technician in Web Application Development | EFA El Campico, Jacarilla, Spain | 2023 – 2025

Technician in IT Systems & Networks | IES Las Espeñetas, Orihuela, Spain | 2020 – 2023

TECHNICAL SKILLS

Backend: Laravel 10–12, PHP 8.3, MySQL, REST APIs, WebSockets/Reverb, queues & jobs, Sanctum, testing (Pest, PHPUnit)

Frontend: JavaScript, TypeScript, Vue.js, React, Astro, Tailwind CSS, Blade, Alpine.js

Mobile: Flutter, Dart, Firebase (Authentication, Firestore, Storage, AI Logic)

AI: Google Gemini (RAG, function calling, embeddings, vision), OpenAI API

DevOps: Git, GitHub Actions (CI/CD), Linux / VPS (Nginx, PHP-FPM, Supervisor), Docker, Cloudflare, Vercel

Methodologies: Scrum/Kanban, Clean Architecture, SOLID, multi-tenant SaaS architecture

Languages: Spanish native · English: professional working proficiency — daily working language (meetings, technical presentations)
